2026 Pre-Plant Planter Start-Up Package

Make certain you are ready for planting season by signing up for our Plant Ready Program. Your Customer Technology Specialist will set up all AMS components needed to ensure you are ready to plant. We will update software, check planter settings within the display, set section control settings, plus perform other calibrations and tests so your planter is ready to go.

Perform LandMark planter pre-plant check list.

- Inspection package included
- Verify activations needed for full planter functionality
- Software Updates for both planter and display
- Clear Codes
- Machine and Implements offsets measured and recorded
- Set-up home pages (3)
- Rate controller(s) set-up for either in-furrow or off the row application
- Calibrate TCM | Check AutoTrac | Check RTK Signal
- Verify section control is activated and set with correct overlaps
- Verify prescriptions will load correctly (if being used)
- Ensure RDA | WDT is functioning (if machine is equipped)
- Check guess row accuracy
- Verify John Deere Operations Center | Variety set-up

2026 Pre-Plant Planter Training Sessions & Clinics

Join us for a training session to learn how to optimize the performance of your planter. Our master service, parts, CTS and sales professionals will be hosting a Planter Clinic to help you get the most out of your planting equipment and minimize the stress of planting season. Visit www.landmarkimp.com/events for dates and more information.

2026 Plant Ready in Field Start-Up

A LandMark planter professional will assist with in-field setting of all row units and planting functions beginning on your first day in the field for planting season.

2026 Plant Ready in Field Follow-Up

A LandMark planter professional will follow up in-field within 2-4 days of startup to check all vital planter functions.
